

Acute Partial Program

Our Acute Partial Program is designed to help those individuals who need more structured and focused care than can be provided in outpatient treatment. It also can help ease the transition from inpatient treatment to home by offering on-campus day treatment in a setting that is warm, nurturing, safe, and comfortable. The goal of the program is to help prepare for a successful transition back to home, work, or school by addressing and managing the symptoms that can make these transitions so difficult.

We offer two separate programs:

- Adolescent Program for individuals aged 14-17 years of age.
- Adult Program for individuals 18 years and older.

PROGRAM HIGHLIGHTS

- Close psychiatric monitoring and medication management by a Psychiatrist and a Registered Nurse
- Group Therapy
- Short-Term Treatment- average length of stay is 2-3 weeks
- Excellent Patient Satisfaction- average of 4.50 (on a 1-5 scale)
- Master's Prepared Clinicians providing personalized treatment planning
- Medication Education and Illness Awareness Groups run by our nursing staff
- Art and Recreational Therapy
- Dedicated clinical staff with a strong commitment to family involvement
- Transportation to and from Philadelphia and select areas of Delaware and Montgomery Counties
- School Program for Adolescents: One hour of classroom time every day, led by a Certified Special Education Teacher
- Dual Diagnosis Programming for Adults: Drug & alcohol process and psycho-educational groups are incorporated into treatment programming twice per week

How To Make a Referral or Be Enrolled

- If you or a loved one is currently receiving inpatient care, your treatment team and/or social worker can make a referral to the program through our Partial Hospitalization Program Growth and Development Manager at 215-487-4080.
- You can contact our Assessment Center/Admissions Department at 215-487-4100 and request an appointment to be evaluated for the Partial Program.

Experienced and Qualified Staff

Our multi-disciplinary team of professionals includes Psychiatrists, Registered Nurses, and Master's Level Clinicians. Our experienced and dedicated team provides personalized treatment planning. We collaborate with other community providers, family members, and school personnel in order to help you develop the coping skills you need to promote a successful transition back to work, school, or home.
